

ABSTRACT

A frame clip (100) for mounting a light source (for example, an arc tube 32) in a lamp. The frame clip (100) comprises a substantially oval body having a longitudinal axis (110) with an opening (112) therein parallel to the longitudinal axis and having a given height, a first inside dimension D_1 and a second inside dimension D_2 , and wherein the second dimension D_2 is greater than D_1 .
